

TECHNICAL ARCHITECTURE

PROJECT NAME	VEHICLE MANAGEMENT USING SALESFORCE
TEAM ID	NM2023TMID04701

TECHNICAL ARCHITECTURE:

Technical architecture is a complex process- with many sub-processes-that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behaviour, and other aspects of the software to project stakeholders.
- Define features, development phase, and technical requirements.
- Provide specifications according to which the solution is defined, managed and delivered
